After working as an analyst for a law firm, I learned that I bring value to a team from any role. I am a creative problem solver and enjoy thinking about and solving difficult problems. I love the attention to detail that programming requires, and get a great deal of gratification from the art of crafting a viable solution. I plan to gain expertise in my area of primary responsibility, and use my interpersonal skills to translate that expertise to non-developers.

## Skills

### LANGUAGES

Ruby  
Javascript  
HTML  
CSS  
SQL  
RSpec  
Sass

### FRAMEWORKS

Ruby on Rails  
AngularJS

### OTHER

jQuery  
Git  
Sinatra  
CircleCI  
AJAX  
ActiveRecord  
Heroku  
Bootstrap

## Education

Dev Bootcamp

Villanova University  
B.S. Economics 2010

## Projects

### Juke

Juke is a playlist collaboration app built using Ruby on Rails, Javascript, and the Spotify API. Juke allows a host to invite guests to view, vote, and suggest songs on a playlist of the host's choosing. Those suggestions can be accepted by the host, and the playlist can be ordered according to vote count.

Managed team workflow and overall vision as Project Lead  
Built ActionMailer functionality  
Implemented modular structure to improve code readability  
Designed and constructed voting feature  
Refactored Spotify API call methods

### Stack Overflow Clone

A recreation of the popular question and answer site for programmers.

AJAX page elements to improve user experience  
Designed and implemented schema using polymorphic associations  
Wrote tests, diagnosed and fixed bugs
